

## Iteration1 - Feedback for code

Team name: **Web-div-eloers**

### Instructor's feedback:

"Well done!

The ""elective\_courses"" in User model defined as a Text field. Consider storing the pre-defined list of electives in a separate table and link that table to User through a relationship. "

### TA demo notes:

<b>Working features (showed during the demo)</b>	Frontend and Backend-Integrated:	Can login as faculty and user. Creating a post. Can view posts and tags. Can add and edit profile details. Language tags is a model that can be selected. Can select research topics you are interested in.
	Frontend only:	
	Backend only:	
<b>Untested and/or non-working code</b>	Frontend only:	Started working on apply for iteration 2. Close to delete as well
	Backend only:	Started working on apply for iteration 2
<b>Comments:</b>		

Score: **100**
